Art Unit: 1745

1. The drawings are objected to because Figure 1 does not include "1M", "13" or "14" as the specification recites. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

2. The disclosure is objected to because of the following informalities: page 1, line 24, "The" is incorrect; page 2, line 20 "electrolyt" is misspelled and page 13, line 20, "intI" is incorrect.

Appropriate correction is required.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claim 7 is rejected under 35 U.S.C. 102(a) as being anticipated by applicant's admitted prior art. (New Rejection)

Pages 1-2 of the present specification set forth a redox battery including the claimed bipolar electrode elements separated by ion exchange membranes and wherein one side of the membrane has the positive electrolyte flow chamber and the other side has the negative electrolyte flow chamber. In addition, the elements have frames wherein separate ducts are formed therein for passage of the two electrolytes therethrough.

5. The following is an examiner's statement of reasons for allowance: none of the prior art of record discloses a multicell electrochemical reactor including bipolar electrode elements having ion exchange membranes therebetween wherein said elements and membranes have

frames. The frames include ducts to allow respective electrolytes to cascadedly therethrough. The frames each have an inner flange portion recessed for accommodating either an electrode or a separator. The flange portion includes retention pins to secure a chemically resistant material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 703-308-1795. The examiner can normally be reached on Monday-Thursday.
